Experienced: AWS · MongoDB · Docker · D3 · Grunt · Adobe · Photoshop, Illustrator, inDesign

## EMPLOYMENT

WeSpire | *Design, run, and measure experiences that improve social, environmental, and business outcomes*

Senior Fullstack Engineer

2021-Current

- Principal pod lead managing a number of developers and guiding them to understand the codebase
- Plan the technical infrastructure of a new design system and begin its implementation into the existing codebase
- Tackle new feature development while updating existing codebase to industry standards

UberMedia | *Leading independent developer of dynamic advertising solutions and feature-rich mobile applications*

Software Engineer II

2018-2021

- Determine operational feasibility by evaluating problem definition, requirements, and proposed solutions.
- Design and implement frontend clients and servers from the ground up using latest technologies
- On-board junior developers by providing guidance on best practices and company culture

Software Engineer

2016-2018

- Develop solutions using AngularJS, Vue.js, Node.js, ReactJS, and Ruby on Rails on numerous projects
- Support legacy products with any development updates, bugfixes, and 3rd party compliances
- Provide primary frontend development for all of UberMedia offerings.

Quality Assurance Engineer

2014-2016

- Identify, record, document, and track bugs using Sprint.ly and Jira Project Tracking software
- Design, develop and execute automation scripts for test plans and test cases using Selenium IDE
- Perform thorough regression testing with Selenium IDE and manually when needed when bugs are resolved

Associate Community Manager

2011-2014

- Provided customer support for multiple mobile applications using Zendesk, Tender Support, and TwitSpark
- Planned and implemented engagement programs for applications using Twitter, Facebook, and YouTube
- Drafted, developed and executed a communication program to 9 million Twitter followers
